

1 **Explain Everything** is an easy-to-use interactive whiteboard and screen-casting app.

2 With **Explain Everything**, teachers or students can use the app to visually and orally represent information, materials, and/or instructions.

3 **Explain Everything** allows you to draw and type as well as import images, videos, PDFs and PowerPoint presentations to be edited, narrated over, drawn on, etc. Users can include links to websites.

4 Presentations can be recorded with or without narration through screen-casting. The app allows users to create multiple slides for a dynamic presentation.

5 The app can be used by teachers for supplementary instruction, instructional review, supporting ELL's in explaining thinking, and much more.

6 The app can be used by students to learn and explain understanding multi-modally, demonstrate understanding of a concept or task, to record work with narration for later studying, and much more.

7 **Explain Everything** allows you and your students to create dynamic multimedia content to support teaching and learning.

What you need to know about “Explain Everything”
