

# AT A GLANCE: CAPTURESPACE

## WHAT IS CAPTURESPACE?

CaptureSpace is video creation software that allows you to record your webcam, microphone, and/or screen. It is ideal for recording lectures, presentations, tutorials, and demonstrations. Integrated with Connect, CaptureSpace videos can be recorded and uploaded completely online.

## KEY FEATURES

There are five recording options:

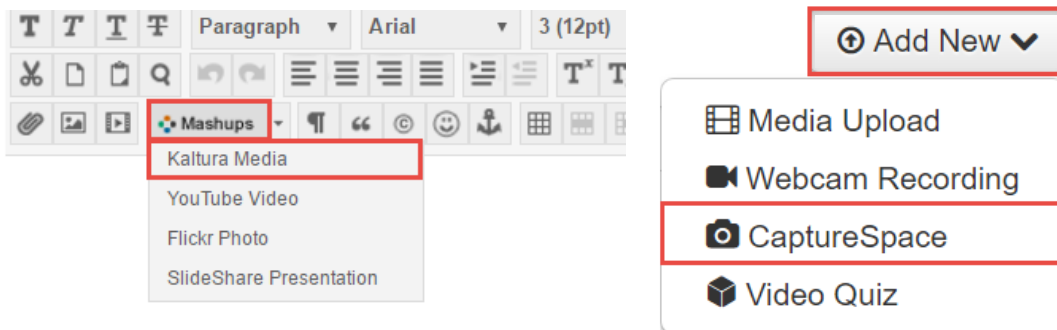

- **Presentations & Lectures:** record from multiple sources with all advanced features.
- **Screen:** record screen and voice.
- **Screen & Webcam:** record screen, video, and voice.
- **Webcam:** record video and voice.
- **Voice:** record only voice.

After recording, you can do basic edits like trimming, removing sections, or adding start/end slides.

## GETTING STARTED

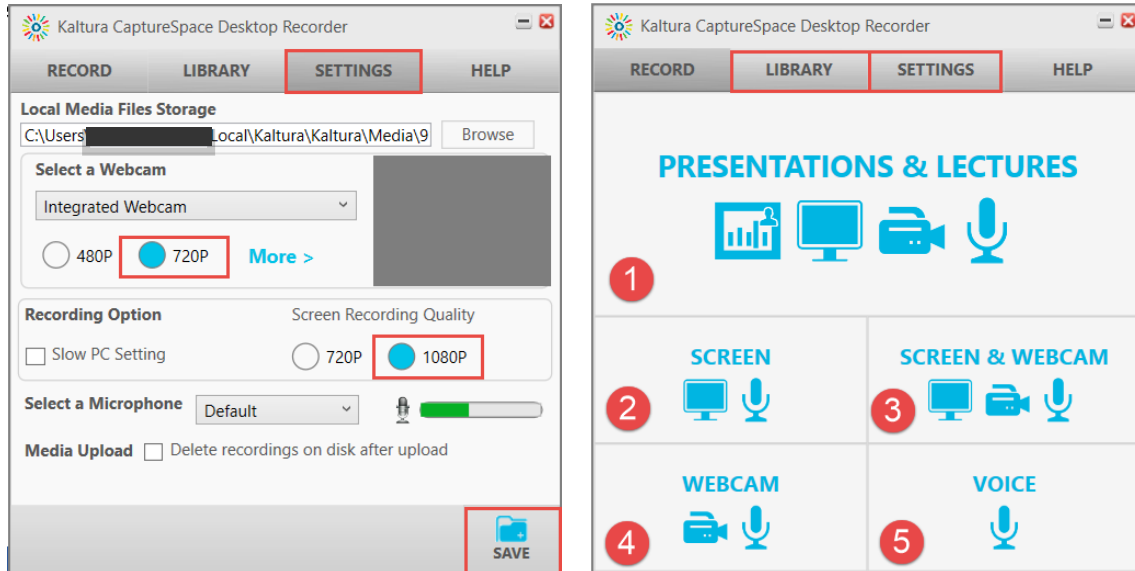

To access CaptureSpace, follow these steps:

1. In any Connect HTML editor, click on the Mashup button and select Kaltura Media. A pop-up window will appear. Click on Add New and select CaptureSpace.

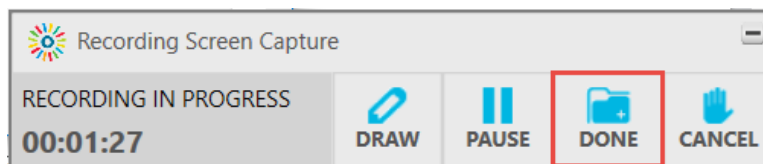

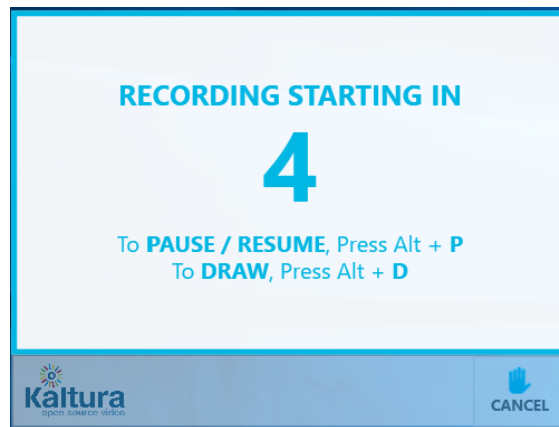

2. The first time you use CaptureSpace, you will be asked to download the software. Once installed, Kaltura CaptureSpace Desktop Recorder should appear in the bottom right corner on your screen.

- Click the Settings tab, set recording quality to 720p for webcam and 1080p for screen capture for best quality, then click Save. On the Record tab, select the type of recording you wish to make.

- Choose one recording option, then click Record. Your recording will start after a countdown. When you finish, click Done to edit, save, and upload to Connect.
